

Application Instructions Secuready kit model SR1

Please read entire instructions first.

CAUTION: Adhesive bonds on contact.

To install the SR1 Secuready kit:

- Select the best anchor location by positioning the equipment where it will be used. Consider the position of each piece of equipment to be secured, where the anchors and cables will be located, and the stiffness of the cable. Be certain mounting surfaces are flat and have no curves.
- Anchors are best applied when mounting surface is horizontal. Tip equipment if necessary.
- Select an anchor and apply CBA liquid adhesive to the anchor's mounting surface. Use enough adhesive so that when the anchor is pressed on, its entire surface becomes completely coated.
Note: Adhesive is moisture activated. In dry environments it may be helpful to lightly blow on wet adhesive surface before mounting.
- Press anchor firmly against the equipment case without twisting for 30 seconds to make sure a solid bond is formed. It is normal for some adhesive to ooze out the sides. Just wipe away any excess adhesive with a tissue.
- Adhesive sets in seconds and anchor cannot be removed or adjusted. Allow several hours to fully set. Maximum bond is achieved after 24 hours.
- Place the equipment back in position and feed the cable through the anchors on each component until the cable lug reaches the first anchor.
- Before proceeding, feed the cable through the center of the steel cylinder and slide the cylinder up the cable.
- Loosely pre-assemble the two plastic clamp pieces using the included nuts and bolts. Pass about 10 inches of cable through the clamp.
- Select a table leg or other secure fixture as a securing point. Loop the end of the cable around the securing point and pass it back through the clamp.
- Once the loop is the desired size, tighten the bolts firmly with the included hex wrench.
- Slide the steel cylinder down the cable and over the plastic clamp. Align the holes in the cylinder with the slot in the clamp and lock the padlock through the holes.

CAUTION: Avoid getting adhesive on skin, in eyes or on clothes. Keep out of the reach of children. Use with care.

Thank you for choosing the Spot Anchor.
